Microsoft Fabric, Power BI and ERP data delivery

Senior, hands-on consultancy, direct contracting and partner subcontracting · UK and Europe

Company overview

Business Intelligence Atlas (Atlas BI) is a UK-based, senior-only Microsoft Fabric and Power BI consultancy led by **Tomasz Kuler**, a lead Microsoft Fabric, Power BI and AI data consultant with more than twelve years of experience delivering data platforms, business intelligence and analytics. The person who scopes the work is the person who builds it. We work with organisations and consultancies across the UK and Europe, mostly remotely.

Specialist capabilities

Microsoft Fabric

Lakehouse and warehouse design, medallion architecture, OneLake, Data Factory, Dataflows Gen2, notebooks (PySpark, Spark SQL, T-SQL), Fabric Link.

Power BI

Semantic models, DAX, Direct Lake and Import, row-level security, deployment pipelines, paginated reports, governance and performance.

ERP and finance data

Dynamics 365 F&O, Oracle Fusion Cloud ERP, Unit4 Agresso, SAP, Xero and Sage: management accounts, consolidation, board packs.

Migration and data quality

Migration data models, reconciliation to source, data quality rules with named owners and monitoring.

Azure data platform

Azure Synapse and Azure Databricks, data modelling and incremental loads.

Enterprise AI

Copilot Studio agents and agent flows, Fabric IQ ontology and MCP, AI-ready data, document extraction with Azure AI services.

Engagement models

Consultancy project Fixed scope and price agreed up front.	**Direct contract** Day rate inside your team, without agency markup.	**Fractional / part-time** Architecture, reviews and technical leadership.
Interim cover Keep reporting running while you recruit.	**Partner subcontracting** White-label or named delivery for consultancies.	**Reviews and rescue** Health checks, architecture reviews, project rescue.

Selected experience (client names confidential)

- Enterprise data model and a Microsoft Fabric lakehouse built from scratch for a cancer research institute, underpinning its move from Unit4 Agresso to Oracle Fusion Cloud ERP.
- Dynamics 365 F&O reporting moved into a Microsoft Fabric Warehouse via Fabric Link for a national food manufacturer: production, stock and finance.
- Data platform and group reporting suite for a private equity-backed healthcare communications group.
- A data product for a continuing healthcare provider whose dashboards were sold to NHS trusts on subscription.
- Led a data transition team through a major UK retailer's IT separation, onboarding thousands of users to Azure, Databricks and Power BI.
- Microsoft Fabric and Power BI capability programme for a local authority finance team working with Dynamics 365 F&O data.

Industries

Manufacturing and food production · healthcare and the NHS · life sciences and research · financial services · private equity · professional services and law firms · retail and supply chain · local government · utilities · SaaS and technology.

Published demonstrations

Three to start with: D365 F&O board pack in Fabric · AI agents on D365 data with Fabric IQ · Data quality monitoring in Fabric.

- Dynamics 365 F&O to a Power BI board pack in Microsoft Fabric, reconciled to the ledger, plus a seven-module D365 series (sales, inventory, payables, commerce, projects, procurement, production).
- AI agents on Dynamics 365 data: Fabric IQ ontology and MCP answering finance questions with DAX.
- Copilot Studio agents for private equity portfolio reporting and NHS operations, with Power BI value reporting.
- Data quality monitoring in Fabric; law firm, continuing healthcare and group finance dashboards.

All demonstrations use Microsoft or synthetic demo data and are documented at businessintelligenceatlas.com, with videos on the Business Intelligence Atlas YouTube channel.

Working with partners and procurement

- Business-to-business engagement through Business Intelligence Atlas; NDAs signed before client details are shared.
- Partner client relationships protected: no direct approach to partner clients; non-solicitation terms accepted.
- Works inside your tools, tickets and repositories; documented handover so your team can support what is built.
- Remote delivery across the UK and Europe, with on-site days by agreement. IR35 status is assessed per engagement on the actual working arrangements.
- Business Intelligence Atlas Limited, company number 14576399, registered in England and Wales. Registered office: Mansion House, Manchester Road, Altrincham, WA14 4RW.
- Insurance certificates and supplier onboarding details are provided on request.
